File Tree

```
user_ids/
└── get_ids.sh   (to submit)
```

Authorized commands : You are only allowed to use the following commands

- builtins
- sort(1)
- cut(1)

Reminder : Grant execution permission to your scripts before pushing them

1 Goal

You must write a script that displays on the standard output the user ids listed in the `/etc/passwd` file. Duplicated ids must not be displayed. The output must be sorted in descending order.

In each line of the file `/etc/passwd`, the user id is between the second and the third `':'` character.

> **Tips**
>
> Your script should return 0 and will only be tested with valid files.

2 Example

```
42sh$ ./get_ids.sh
65534
964
920
845
562
